

## Maintenance guide

# KÄHR'S UPOFLOOR QUARTZ MOSAIC, MOSAIC CLASSIC, TEMA, UNI

### INITIAL CLEANING

Remove loose dirt with a mop or vacuum cleaner. Wash the floor using a combination machine with red pads, a scrubbing machine with medium hard brushes, or a floor cleaning machine and a wet vacuum cleaner. Use a mild alkaline cleaning and maintenance agent. Rinse the floor carefully but avoid excessive use of water. Treat the cleaned floor with an SHS machine and a maintenance care agent.

### INITIAL POLISHING

Initial polishing is not needed because of PUR (polyurethane) treatment.

### DAILY MAINTENANCE

Alternate dry/damp cleaning with wet cleaning methods. Regular treatment with a combination machine keeps the floor clean and heavy basic cleaning can be avoided. Use a mild alkaline cleaning and maintenance agent. You can also clean the floor with an SHS machine and a maintenance agent. When necessary, cleaning with a stronger maintenance agent is recommended.

### BASIC CLEANING

Basic cleaning should be performed on very soiled floors exposed to heavy traffic. Clean the floor with an alkaline or strong alkaline detergent. Use a floor cleaning machine with red or blue pads. Clean old and heavily soiled floors with brown pads. Rinse the floor carefully. Apply a maintenance care agent solution to the cleaned floor and treat the dry surface with an SHS machine. When necessary, localised polishing can be carried out on areas with most traffic.
