

UPOFLOOR®

MAINTENANCE

UPOFLOOR QUARTZ/HOVI MOSAIC, QUARTZ/HOVI MOSAIC CLASSIC, QUARTZ/HOVI TEMA & QUARTZ/HOVI UNI

Initial cleaning

Remove loose dirt with a mop or vacuum cleaner. Wash the floor using a combination machine with red pads, a scrubbing machine with medium hard brushes, or a floor cleaning machine and a wet vacuum cleaner. Use a mild alkaline cleaning and maintenance agent. Rinse the floor carefully but avoid excessive use of water. Treat the cleaned floor with an SHS machine and a maintenance care agent.

Initial polishing

Initial polishing is not needed because of PUR (polyurethane) treatment.

Daily maintenance

Alternate dry/damp cleaning with wet cleaning methods. Regular treatment with a combination machine keeps the floor clean and heavy basic cleaning can be avoided. Use a mild alkaline cleaning and maintenance agent. You can also clean the floor with an SHS machine and a maintenance agent. When necessary, cleaning with a stronger maintenance agent is recommended

Basic cleaning

Basic cleaning should be performed on very soiled floors exposed to heavy traffic. Clean the floor with an alkaline or strong alkaline detergent. Use a floor cleaning machine with red or blue pads. Clean old and heavily soiled floors with brown pads. Rinse the floor carefully. Apply a maintenance care agent solution to the cleaned floor and treat the dry surface with an SHS machine. When necessary, localised polishing can be carried out on areas with most traffic.
